

**Subject – Maths**  
**Class – 1<sup>st</sup>**  
**Lesson – 4**

**Q.1 How many left?**

- i. 4 butterflies take away 2 butterflies left \_\_\_\_ butterflies.
- ii. 5 balls take away 1 balls left \_\_\_\_ balls.
- iii. 4 cars take away 3 cars left \_\_\_\_ cars.
- iv. 9 cauliflowers take away 7 cauliflowers left \_\_\_\_ cauliflower.
- v. 6 horses take away 3 horses left \_\_\_\_ horses.

**Q.2 Subtract using counters:-**

$5 - 1 = \underline{\quad}$                        $6 - 2 = \underline{\quad}$                        $9 - 5 = \underline{\quad}$

$6 - 5 = \underline{\quad}$                        $8 - 6 = \underline{\quad}$                        $7 - 4 = \underline{\quad}$

$9 - 5 = \underline{\quad}$                        $7 - 2 = \underline{\quad}$                        $9 - 3 = \underline{\quad}$

**Q.3 Match the following:-**

$9 - 1$            -                       $4 - 0$

$6 - 1$            -                       $3 - 2$

$9 - 6$            -                       $9 - 2$

$7 - 1$            -                       $8 - 3$

$8 - 1$            -                       $6 - 3$

$5 - 1$            -                       $8 - 2$

$4 - 3$            -                       $8 - 0$

$9 - 0$            -                       $6 - 4$

$$9 - 7 \quad - \quad 9 - 0$$

**Q.4 Write the answer:-**

$$\begin{array}{r} 3 \\ - 0 \\ \hline \end{array} \quad - \quad \begin{array}{r} 5 \\ - 5 \\ \hline \end{array} \quad - \quad \begin{array}{r} 3 \\ - 3 \\ \hline \end{array} \quad - \quad \begin{array}{r} 6 \\ - 0 \\ \hline \end{array}$$

$$\begin{array}{r} 7 \\ - 7 \\ \hline \end{array} \quad - \quad \begin{array}{r} 8 \\ - 0 \\ \hline \end{array} \quad - \quad \begin{array}{r} 1 \\ - 1 \\ \hline \end{array} \quad - \quad \begin{array}{r} 2 \\ - 0 \\ \hline \end{array}$$

$$\begin{array}{r} 7 \\ - 0 \\ \hline \end{array} \quad - \quad \begin{array}{r} 5 \\ - 0 \\ \hline \end{array} \quad - \quad \begin{array}{r} 8 \\ - 8 \\ \hline \end{array} \quad - \quad \begin{array}{r} 9 \\ - 0 \\ \hline \end{array}$$

$$\begin{array}{r} 6 \\ - 6 \\ \hline \end{array} \quad - \quad \begin{array}{r} 4 \\ - 4 \\ \hline \end{array} \quad - \quad \begin{array}{r} 2 \\ - 2 \\ \hline \end{array} \quad - \quad \begin{array}{r} 6 \\ - 5 \\ \hline \end{array}$$

**Q.5 Write the missing numbers to make the subtraction statements true.**

- |                                   |                                   |
|-----------------------------------|-----------------------------------|
| i. $\underline{\quad} - 3 = 2$    | ix. $7 - \underline{\quad} = 1$   |
| ii. $\underline{\quad} - 4 = 5$   | x. $6 - \underline{\quad} = 2$    |
| iii. $\underline{\quad} - 7 = 1$  | xi. $\underline{\quad} - 2 = 0$   |
| iv. $6 - \underline{\quad} = 5$   | xii. $\underline{\quad} - 2 = 2$  |
| v. $2 - \underline{\quad} = 1$    | xiii. $9 - \underline{\quad} = 2$ |
| vi. $\underline{\quad} - 1 = 8$   | xiv. $7 - \underline{\quad} = 1$  |
| vii. $9 - \underline{\quad} = 1$  | xv. $8 - \underline{\quad} = 3$   |
| viii. $8 - \underline{\quad} = 5$ | xvi. $1 - \underline{\quad} = 0$  |

- $9 - \underline{\quad} = 6$  means what number is taken away from 9 so that 6 is left. The answer is 3.
- $\underline{\quad} - 3 = 6$  means from what number we must subtract 3 so that 6 is left. The answer is 9.
